

HYPOGLYCEMIA

Nutritional Support Protocol

Lifestyle Recommendations:

1. Avoid stress and extra obligations.
2. Avoid alcohol consumption and smoking.
3. Participate in a regular balanced exercise program that includes wearing a pedometer to ensure that you collect steps and move more. High intensity short bursts (20-60 seconds) of activity during the day are recommended to enhance growth hormone release. Also engage in resistance training that works all major muscle groups (work each group at least 2 times a week).

Dietary Recommendations:

1. Avoid all sugars. Replace sugar with the polyol sugar xylitol.
2. Avoid white flour and all refined carbohydrates including cereals and pasta.
3. Get a balance of omega 3s (salmon, mackerel, herring, sardines) and omega 9 fats (olive oil, olives, almonds, hazelnuts, avocados).
4. Choose lean, clean quality protein at each meal such as chicken breast, turkey breast, lean beef, fish (especially salmon and sardines), eggs and whey protein.
5. Do not skip meals.
6. Avoid hydrogenated vegetable oils and fried foods.
7. Cook with olive oil, coconut oil, or macadamia nut oil at low heat.
8. Snack on vegetables and small amounts of nuts, olives or avocado.
9. Eat 5-9 servings of fresh fruits and vegetables daily (fruits must be limited to 1 -2 per day due to sugar content) OR add one heaping tablespoon of PaleoGreens and PaleoReds to your favorite drink.
10. Carry PaleoBars with you to prevent missing snacks throughout the day.

Supplement Recommendations:

In addition to the core nutrient program recommended by your Health Care Professional and/or from the results of your most recent Designs for Health Metabolic Profile:

Chromium Synergy™:	1 with each meal, 3 per day
Adrenotone Plus™:	1 capsule with each meal, 3 per day
L-Glutamine:	1 capsule per day or 1 teaspoon per day
GlucoSupreme™ Herbal:	1 capsule 3 times per day
